 Rahul-Vaddi-Space

## SKILLS

- Architecture: Microservices.
- Backend: Python, RESTful APIs.
- Cloud Development: Azure App Services, Azure Container Registry (ACR), Azure Kubernetes Service (AKS).
- Cloud DevOps: Azure DevOps for CI/CD pipelines, Docker, Kubernetes, Service Connections.
- Cloud Infrastructure: Azure Blob Storage.
- Databases: MongoDB.
- Data Engineering: Apache Airflow (ETL).
- Frameworks/Technologies: FastAPI, GitHub.
- Monitoring & Observability: Grafana, Prometheus.
- Operating Systems: Windows, Linux.
- Scripting: Bash (Shell).

## EDUCATION

### Master of Technology (Integrated), Software Engineering

Vellore Institute of Technology  
June 2016 - July 2021

### Intermediate

Narayana Institute  
June 2014 - April 2016

### Class X

Kendriya Vidyalaya  
April 2013 - March 2014

## LANGUAGE

**English** Full Professional Proficiency

**Hindi** Full Professional Proficiency

**Telugu** Native/Bilingual Proficiency

## EXTRA CIRCULAR

- Mentorship and Knowledge Sharing: Mentored colleagues in cloud technologies, developed training materials, led scrum presentations, and assisted in onboarding new team members to ensure smooth project execution.

# RAHUL VADDI

## PROFILE

3+ years of experience in tech, with more than 1.6 years focus on Azure DevOps, Azure services, and FastAPI development. Skilled in containerization (Docker) and orchestration (Kubernetes), optimizing application scalability and deployment. Experience in AI/ML model deployment, testing Sensor Interface KPI tools, and UI development with PyQt Designer.

## WORK EXPERIENCE

### Cloud engineer - ADAS technology, Bosch Global Software Technologies

January 2023 - Present

- Developed and Deployed Microservices: Implemented Python back-end logic using FastAPI for ML model inferencing, containerized modules using Docker, and deployed them in a microservices architecture with Azure Container Registry (ACR) and Kubernetes for orchestration.
- Automated CI/CD and Workflow Management: Built automated deployment pipelines and used Apache Airflow for workflow orchestration, creating DAGs to manage and automate data workflows and task execution.

### Backend developer, Bosch Global Software Technologies

July 2022 - December 2022

- Developed and Deployed Scalable AI/ML Tool: Built a tool for AI/ML model deployment using FastAPI, Docker, and cloud migration techniques, hosted on Azure Cloud. Deployed Azure Web App Service for automatic scaling and load balancing.
- Version Control and Documentation: Utilized Git in Azure DevOps for source code management and created an endpoint for a pre-trained model in Azure Machine Learning Studio, documenting the deployment and inference process in the organization's wiki.

### Software test engineer, Bosch Global Software Technologies

September 2021 - June 2022

- I began my first full-time professional journey as Software Test Engineer. My role was to test sensor Validation Tool. I have performed thorough manual testing to ensure the tool functions as expected, including unit testing, integration testing and Documentation Review.

### Project trainee, Bosch Global Software Technologies

January 2021 - June 2021

- As part of the 6 months Project Trainee, I was focused on Developing a Sensor Interface Validation Tool with PyQt designer.

## PROJECTS

### Commuter Flow Projection based on Long Short-Term Memory | RNN

November 2020

- The motive of this project to analyse the statistical data characteristics of historical passenger flow is the premise basis for proposing the prediction scheme, improving the prediction method and obtaining more accurate prediction results.

### Driver Sleep Detection System | Artificial Intelligence, DL

April 2020

- The motive of this project is to locate, track and analyse both the driver's face and eyes to compute a drowsiness index to prevent accidents.

### Celkart Management System | Summer Internship | CSS, DJANGO, HTML5, PYTHON

May 2019

- The motive of this project is to meet the demands of modern online shoppers while providing sellers with the tools they need to succeed in the digital marketplace and to show best offers to the customers. Used python programming language to implement backend logic, and API integrations and while employing frontend technologies like HTML, CSS for the user interface.

## CERTIFICATE

### Azure DevOps crash course

- Azure Devops and Continuous Integration and Continuous Delivery (CI/CD) release pipelines.

## AWARD

### Rockstar Bosch Global Software Technologies

- This award reflects my proactive approach, collaborative spirit, and unwavering commitment to project's success.

### Extra Miler Bosch Global Software Technologies

- Awarded Extra Miler for being active part of a team.

### Shout out Bosch Global Software Technologies

- Received Shout out Award for my active contributions.
